

How do they benefit my operation?

Test your soil health through

- Soil cover
- Residue breakdown
- Soil color
- Plant roots
- And more!

Discover if your field might suffer from:

- Compaction
- Soil organism habitat loss
- Organic matter depletion

Now that you've identified these, we can make a plan of action!

- Reduced tillage
- Residue management
- Cover crop planning
- Nutrient management
- Water requirements and management
